PROJECTS

- **Cassava-Healthy-Finder**
 - Designed a cross-platform application for Android, iOS, and web to aid farmers and agricultural professionals.
 - Implemented disease detection using AI-powered image classification models trained on diverse datasets.
 - Integrated Firebase for user authentication, real-time database functionalities, and secure data storage.
 - Developed an offline mode to ensure usability in remote areas with limited internet access.
 - My Role: Spearheaded dataset collection and pre-processing, developed and trained the image classification model, and ensured seamless integration with the backend services.
 - **Tech Stack:** Flutter, Firebase, TensorFlow, Python
- **Travel Agency Website**
 - Developed a modern travel agency platform showcasing destinations and services with responsive design for all devices.
 - Implemented key features including destination showcase with image galleries, interactive contact forms, and intuitive navigation.
 - Created an elegant and user-friendly interface to enhance visitor engagement and browsing experience.
 - Designed and structured content to highlight travel services and destination information effectively.
 - **Tech Stack:** HTML, CSS, JavaScript
- **Responsive Restaurant Website**
 - Developed a responsive food/restaurant platform with HTML, CSS, JavaScript, PHP, and MySQL.
 - Created functionalities for online menu browsing, secure order placement, and personalized user account management.
 - Designed the database schema to handle real-time order processing and user data storage efficiently.
 - Ensured cross-device compatibility with responsive design principles for optimal user experience on desktops, tablets, and mobile devices.
 - **Tech Stack:** HTML, CSS, JavaScript, PHP, MySQL
